

Dear **Hiring Manager, IT Recruiter,**

I am excited to apply for your posted full-stack position. Following the iPhone story is following the history of technology, as you can clearly see how one product can change the world. Everytime I check my phone I am thinking of creating the next world changer. I'm also committed to leaving the world better than I found it with a deep belief that each of us contributes to that effort in our own way, bringing a passion for what I do best and what I believe matters most.

While my recent experience is in a different heavily regulated industry, my background includes extensive problem solving analysis and reporting to all levels of management, as well as a variety of internal and external stakeholders. I love to dive in and really understand not just the situation – but the story that tells how it fits into the broader picture and that mindset fits very well with the company's philosophy. I would love to be a crazy one.

For the past year, I have been solving problems through coding. Developing great websites and apps with fantastic partners from around the world, in a multicultural environment that encourages kindness and collaboration. This helped me experience coding from scratch and allowed me to experiment with languages and frameworks that give me options to fulfill my development expectations, keeping an open mind to learn new technologies.

In my learning journey through [Microverse](#), a remote software development school, I have developed great apps(ToDo, Bookstore, Leaderboard) following the industry best practices, object oriented programming guidelines, and software design patterns. My favorite stack is React - Ruby on Rails. As a Colombian, my main language is Spanish, but since I have been working remotely through Zoom and Slack, my communication and collaboration skills in English are very professional and fluid.

I also love the opportunity to flex my analytic muscles and create the opportunity to play “what if?” with the data. In my current role, that manifests as a software development student of I comply with best practices and remote partners details to build a flexible project that ties efficiency (and stewpot production) to various levels of forecasted performance. As planned activities are rolled out, I track performance and dig into variances – not just the “what,” but also the “why”.

In my previous role, I dug deep into entertainment narratives set to look for patterns of activity for targeted audiences and live performances. To facilitate that review, I worked closely with the technical staff to discuss what they were seeing in the field, and eventually understand every requirement for a great show.

While the pandemic has required many difficult adjustments, it has also dramatically accelerated changes to how entertainment operates. Data needs to drive these changes to connect them to current business models. This will require new data, and changes to how existing data is thought about and used. I'm excited to be a part of that.

I look forward to speaking with you to learn more about your organization, and the career opportunities it offers me, as well as how my skills can help Stewpot Enterprises succeed. Thank you for your consideration.

I'm looking forward to hearing from you.

Thank you

Raul Ospina - Full-Stack Engineer.

Raul Ospina

FULL STACK WEB DEVELOPER

I'm a full-stack software developer completing Microverse, an intense, hands-on online programming school that teaches software while cracking real code projects. I have a deep passion for technology and our ability to change lives with code.

EXPERIENCE

MICROVERSE, *Remote*

Mentor (Volunteer), May 2022 – Present

- Mentored junior web developers, providing technical support through code reviews.
- Proposed improvements to code organization to enhance code quality and overall performance.
- Provided advice and tips on how to maintain motivation to maintain longevity in the program.

RCN Television, *Bogotá, Colombia*

Cameras Director, August 2018 – February 2022

- Broadcasted live international sports events, leading and integrating different areas into one big goal.
- Proposed improvements in production and technical processes to meet standards with minimal errors.

EDUCATION

MICROVERSE, May 2022 - Present

Remote Full Stack Web Development Program, Full Time

- Spent 1300+ hours mastering algorithms, data structures, and full-stack development while simultaneously developing projects with Ruby, Rails, JavaScript, React, and Redux.
- Developed skills in remote pair-programming using GitHub, industry-standard Gitflow, and daily standups to communicate and collaborate with international remote developers.

ACADEMIA DIBUJO PROFESIONAL, June 2001 – July 2004

Technical Degree, Advertising and Design

- Learned the production process of graphics, illustrations, and multimedia pieces, from concept to publishing.
- Learned the basics of Html Website design and ActionScript Flash.

SKILLS

Front-End: JavaScript, React, Redux, jQuery, HTML5, CSS3

Back-End: Ruby, Rails, MySQL

Tools & Methods: Git, GitHub, Heroku, Netlify, Mobile/Responsive Development, RSpec, TDD, Chrome Dev Tools

Professional: Remote Pair-Programming, Teamwork, Mentoring

PROJECTS

[Todo App](#)

- Very useful to keep track of daily activities.
- Built with: Made with JavaScript, and bundled with Webpack.

[BlogApp](#)

- Ruby on Rails app MVC project.
- Users, Posts, Comments and Likes.

[Booklist](#)

- Great web App to make a list of awesome books to read. Made with love, and JavaScript ES6 Modules.
